

## **JOB DESCRIPTION: SOFTWARE ENGINEER**

Clinical Architecture is a leading Healthcare IT solutions provider. Through our comprehensive suite of products and solutions, we help customers across the healthcare vertical utilize disparate information for analytics, clinical decision support and interoperability. Our mission is to help evolve healthcare with a focus on the quality and usability of clinical information.

Design, develop and unit test web-based software as service applications, and mobile web applications. Help streamline and transform how clinical documentation is collected and clinical reasoning is administered. Step up, lead, inspire and push the boundaries of web development.

We are currently looking for a Mid-level software engineer to join our team of engineers.
